

## **International Symposium Proposal by Invited Speakers**

### **Proposed and Organized by Leading Researchers**

This special symposium track will be organized within the scope of SEMIMATER 2026 and is dedicated to invited speakers and senior researchers who wish to propose and organize their own focused international symposia in advanced semiconductor materials, devices, and technologies.

#### **Proposed symposia should aim to:**

- Define a clear and focused scientific theme
- Attract international participation
- Include potential keynote or invited speakers
- Foster in-depth discussion and collaboration
- How to Propose a Symposium

Invited speakers who wish to propose a symposium are kindly invited to contact the Conference Chair with a short proposal including the proposed symposium title, scope, key topics, and a preliminary list of potential speakers. All proposals will be evaluated by the SEMIMATER 2026 Organizing Committee.
